**Note: The results relate only to the specimen tested and should be correlated with clinical findings.**

**Interpretation guidance:**

- Testing of referred clinical specimens was considered on the basis of request/ referral received from / through State Surveillance Officer (SSO) of concerned state integrated disease surveillance program (IDSP). Any other health care facility affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude an infection\*.
- A positive test result is only tentative, and will be reconfirmed by retesting.
- Repeat sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease. The repeat specimens may be considered after a gap of 2-4 days after the collection of the first specimen for additional testing if required\*.
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentations or for publication in any journals without the prior permission of the Director General, ICMR.

**DISCHARGE**

- Patient Stable
- Report : Attached herewith
- PROVISIONALY NEGATIVE FOR COVID19

**ADVICE TO FOLLOW**

- Temperature charting (4 times a day-6 hourly)
- Steam Inhalation (For 10 min.) (4 times a day -6 hourly)
- Saline Gargles (4 times a day -6 hourly)
- Plenty of Fluids including Lukewarm water and hot beverages (3L\Day)
- Frequent hand washing
- Sneeze in your sleeve
- Keep nose and mouth covered
- Review as required

Successfully completed 14 days of facility quarantine period and advised to remain home quarantine for next 14 days.
