Dr. Deepjyoti Kalita
सह-आचार्य / Associate Professor
सूक्ष्मजीव विज्ञान / Microbiology
एम्स, ऋषिकेश / AIIMS Rishikesh.

Note: The results relate only to the specimen tested and should be correlated with clinical findings.

Interpretation guidance:

- Testing of referred clinical specimens was considered on the basis of request/ referral received from / through State Surveillance Officer (SSO) of concerned state integrated disease surveillance program (IDSP). Any other health care facility affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude an infection*.
- A positive test result is only tentative, and will be reconfirmed by retesting.
- Repeat sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease. The repeat specimens may be considered after a gap of 2-4 days after the collection of the first specimen for additional testing if required*.
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentations or for publication in any journals without the prior permission of the Director General, ICMR.

DISCHARGE

- Patient Stable
- Report : Attached herewith
- PROVISIONALY NEGATIVE FOR COVID19

ADVICE TO FOLLOW

- Temperature charting (4 times a day- 6 hourly)
- Steam Inhalation (For 10 min.) (4 times a day -6 hourly)
